Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, 17-37, drawn to a method of promoting wound healing.

Group II, claim(s) 16, drawn to a method of promoting fistula healing.

Group III, claim(s) 38, drawn to a method of producing non-immunogenic autologous fibroblasts.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II involve methods of treating two very different conditions with a fistula usually involving more than one anatomical structure, whereas wound healing involves the epithelial layers of the skin. . Group III is a method of producing a specific form of cell (fibroblasts) and involves features not found in Groups I-II.

A telephone call was made to Stuart MacPhail on 11/04/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
